Job Title: Technical Writer Intern
Location: Orem Headquarter Offices
Reports to: VP QA and Regulatory Affairs
Wage Category: Part-Time, Temporary; 20 hours/week
Wage: $13 - $14 / hour

Job Statement
Access to oral health care is essential to promoting and maintaining overall health and well-being of an individual, yet only half of the population visits a dentist each year. We are seeking an individual who can research this issue and create a publishable paper describing the need to improve access to oral healthcare for all people and the benefits of using handheld dental x-ray technology to help achieve this objective.

Essential Functions
• Review published documentation to understand the issue of oral healthcare and access to care paying particular attention to barriers to care
• Gather and analyze from Aribex, publications, studies, regulations, organizations, and customer experience, the benefits of a handheld x-ray with respect to access to care
• Gain a solid understanding of radiation safety principles, and describe how Aribex products comply
• Write a Review Paper summarizing the above, to be submitted for publication

Minimum Job Skills, Experience and Requirements
• Pre-dental, life science, physical science or psychology major
• Have achieved at least a junior level in an accredited university
• Background and/or interest in radiation protection
• Passed English 316 – Technical Communication, or equivalent
• Have access to a computer to work independently of Aribex

Additional Preferred Qualifications
• Research experience
• Technical writing, including publications
• Good verbal and written communication skills
