Tim van der Horst (Ph.D. ‘10)
Malware Researcher at Blue Coat Systems

Y Grad School

Biography:

Tim van der Horst is a Malware Researcher at Blue Coat Systems. His research focuses on the identification and tracking of malnets, i.e., the infrastructure created by the Bad Guys to host malware and drive traffic (via search engine poisoning, spam, social networking, etc.) to their sites. Dr. van der Horst graduated with a PhD in Computer Science from Brigham Young University in April 2010.
